I: Choose one best answer for the following questions:

- 1. Which of the following tests can be used to confirm eradication of H. pylori?**
 - a) Urea breath test
 - b) Stool antigen assay
 - c) EGD with biopsies
 - d) Serologic testing
- 2. ACEI used in?**
 - a) Hyperkalemia
 - b) Diabetic nephropathy
 - c) HF with Peripheral edema
 - d) All of the above
- 3. Contraindicated during pregnancy?**
 - a) Methotrexate
 - b) Cefazolin
 - c) Nifedipine
 - d) None of the above
- 4. Safe during pregnancy?**
 - a) Cefazolin
 - b) Ciprofloxacin
 - c) ACEIs
 - d) ARBs
- 5. Red man syndrome caused by?**
 - a) Vancomycin
 - b) Gentamycin
 - c) Cefazolin
 - d) Clarithromycin
- 6. Bone fracture caused by?**
 - a) Pioglitazone
 - b) Metformin
 - c) Insulin
 - d) Exenatide
- 7. Drug family increase GLP?**
 - a) GLP
 - b) DPP
 - c) Metformin
 - d) Insulin

8. Therapeutic range of INR in DVT?

- a) 2 - 3
- b) 2.5 - 3.5
- c) 0.8 - 1
- d) 1 - 1.5

9. Warfarin monitoring can be done by?

- a) INR
- b) PTT
- c) APTT
- d) CPC

10. Heparin mechanism?

- a) Anti-thrombin III
- b) Inhibit liver coagulation factor
- c) A and B
- d) None of the above

11. Anticoagulant used in first trimester?

- a) Enoxaparin
- b) Warfarin
- c) Apixaban
- d) alteplase

12. Monitoring of Heparin can do by?

- a) PT
- b) aPTT
- c) INR
- d) CBC

13. Dose of warfarin reach its maximum effect after?

- a) 1 day
- b) 3 hours
- c) 3 days
- d) None of the above

14. Quinolones cause in patient less than 18 years?

- a) Cartilage damage
- b) Pneumonia
- c) All of the above
- d) None of the above

15. GLP1 analog drug?

- a) Exenatide
- b) Pioglitazone
- c) Metformin
- d) Glyburide

16. Patient with H. pylori and have hypersensitivity from Penicillin can treated by?

- a) PPI - Metronidazole - Clarithromycin
- b) PPI - Metronidazole - Bismuth subsalicylate - Tetracycline
- c) PPI - Metronidazole - Amoxicillin
- d) Both A and B

17. NSAID differ from H. pylori in peptic ulcer?

- a) Mainly effect stomach
- b) Mainly effect duodenum
- c) A and B
- d) None of the above

18. Which one of the following most use in meningitis?

- a) Cefazolin
- b) Ceftriaxone
- c) Cefuroxime
- d) Cefpodoxime

19. Which of the following is L.M.W.H anticoagulation?

- a) Enoxaparin
- b) Tinzaparin
- c) Bivalirudin
- d) Both A + B

20. Antidote of heparin is?

- a) Protamine
- b) Enoxaparin
- c) Dalteparin
- d) Tinzaparin

21. Which of the following direct reversible thrombin inhibitors used in heparin induced thrombocytopenia?

- a) Lepirudin
- b) Bivalirudin
- c) Dalteparin
- d) Argatroban

22. Which of the following is side effect of heparin?

- a) Bleeding
- b) Osteoporosis
- c) Thrombocytopenia
- d) All of the above

23. Vit K reductase inhibitor?

- a) Warfarin
- b) Apixaban
- c) Ezetimibe
- d) Eptifibatide

24. Streptokinase is?

- a) Natural protein produced from streptococci
- b) Synthetic protein
- c) Antiplatelet
- d) None of the above

25. Streptokinase is?

- a) Natural protein produced from streptococcus
- b) Tissue plasminogen activator
- c) Can develop allergic reaction
- d) Both A + C

26. Amphotericin B decreases which of the following?

- a) Ca
- b) K
- c) Na
- d) Mg

27. Not barrier contraceptive

- a) Patch
- b) Nova ring
- c) Diaphragm
- d) Condom

28. All of the following are complications of cirrhosis except?

- a) Ascites
- b) Hypertension
- c) Diabetes mellitus
- d) Spontaneous bacterial peritonitis

29. Amphotericin B with lipid associated version is?

- a) To decrease side effects
- b) To increase effect
- c) To convert IV route to oral
- d) None of the above

30. IIb/IIIa inhibitors?

- a) Heparin
- b) Warfarin
- c) Eptifibatide
- d) Enoxaparin

31. Antidote of Warfarin toxicity?

- a) Vit K
- b) Fresh frozen plasma
- c) Both A + B
- d) None of the above

32. First-line drug for treatment of type 2 diabetes mellitus and obesity?

- a) Metformin
- b) Insulin
- c) Pioglitazone
- d) Sitagliptin

33. Contraindicated drugs in type C heart failure?

- a) Pioglitazone
- b) Metformin
- c) Both A + B
- d) None of the above

34. SGLT2 drugs?

- a) Canagliflozin
- b) Metformin
- c) Insulin
- d) Exenatide

35. All of the following are true about -glucosidase inhibitors EXCEPT?

- a) Cause Hypoglycemia
- b) Mixed with other drugs
- c) Used in type 1 and type 2
- d) Acarbose, Miglitol

36. Which of the following drugs don't cause QT-prolongation?

- a) Azithromycin
- b) Gatifloxacin
- c) Gentamicin
- d) Clarithromycin

37. Aminoglycosides can lead to one of the following EXCEPT?

- a) Inhibit aerobic bacteria
- b) Nephrotoxicity
- c) Time-dependent
- d) All of the above

38. Digoxin cause the following EXCEPT?

- a) Increase chronotropic
- b) Increase inotropic
- c) Increase renal blood flow
- d) decrease the preload

39. inflammatory bowel disease is treated by?

- a) Mesalamine
- b) Rifaximin
- c) ondansetron
- d) Bisacodyl

40. Which of the following is Enzyme inhibitor?

- a) Phenobarbital
- b) Carbamazepine
- c) Cimetidine
- d) Rifaximin

41. GIT irritation and lactic acidosis are side effects of?

- a) Metformin
- b) Pioglitazone
- c) Insulin
- d) Exenatide

42. Which of the following inhibit Vit B12 absorption?

- a) Metformin
- b) Pioglitazone
- c) Insulin
- d) Exenatide

43. Character of type 1 diabetes mellitus?

- a) Destroy beta cell in the pancreas
- b) Insulin deficiency
- c) Insulin resistance
- d) None of the above

44. Patient with hyper sensitivity to penicillin can use?

- a) Augmentin
- b) Erythromycin
- c) Ceftriaxone
- d) Amoxicillin

45. Which of the following is tissue plasminogen activator?

- a) Alteplase
- b) Streptokinase
- c) Heparin
- d) Warfarin

46. Sulfonylureas cause?

- a) Hypoglycemia
- b) Weight gain
- c) A and B
- d) None of the above

47. The initial dose of diuretics that uses in ascites?

- a) Furosemide 40mg once daily
- b) Furosemide 100mg once daily
- c) Spironolactone 40mg daily
- d) Spironolactone 100mg and Furosemide 40mg daily

48. Which of the following PPI regimens is/are preferred for old patient with esophagitis?

- a) Omeprazole
- b) Lansoprazole
- c) Pantoprazole
- d) Esomeprazole

49. The best antiepileptic drug for women uses contraceptive?

- a) Lamotrigine
- b) Ethosuximide
- c) Levetiracetam
- d) Diazepam

50. Which of the following Combination contraceptive?

- a) Desogestrel
- b) Yaz
- c) Medroxyprogesterone acetate
- d) B and C
